

PGF REVIEW

QUARTER 4 - 2010

NEW HOUSE BUILDING PRODUCT PORTFOLIO

After many years of developing a range of products for the House Building sector, and after acquiring the mould set previously used by GRP Structures, we have (at last!) organised details of the 200+ items in to a single database. It covers all the Canopies, Bays, Dormers, Door Surrounds etc. etc which we have existing production tooling for, ensuring the widest option of sizes, finishes and design without the expense of creating new masters and moulds. **Production Glassfibre has been supplying** national companies including Taylor Wympey,

Barratt Homes, Lovell Construction and FHM for many years as well as a raft of regional and local builders. We are proud of our ability to supply nationally, but to provide a local level of service from our factories spread through the country. And because we supply mouldings to a multitude of other sectors, **the company is 'safe as houses'** financially at a difficult time for many of our competitors.

For a copy of our House Building Product Portfolio, either on paper or CD, or to make arrangement for us to visit you or you to come and see round one of our factories, please contact Wayne direct at the e:mail address or phone number opposite.

NEW NATIONAL SALES MANAGER

Production Glassfibre are pleased to announce the appointment of Wayne Hutton as National Sales Manager, and member of the senior management team. With a background in sales for such professional organisations as Sheffield Insulation Group and the German chemical giant Sto International, Wayne will bring a structured and tenacious approach to growing business at his new company.

Based in Sheffield, Yorkshire, Wayne will have a national remit across all business categories, working in conjunction with the General Managers and the Board at Production Glassfibre. His first priority on joining will be national and regional house builders. Wayne can be contacted direct at:
wayne@productionglassfibre.co.uk
or
07979 040300

The National supplier with a Local service

5-ALIVE AT THE NEC

The recent International Caravan & Motorhome Show held at Birmingham's ubiquitous exhibition centre highlighted Production Glassfibre's growing presence in this important leisure sector. Various panels and products made at our Chorley factory could be found on 5 different stands- some exterior, some interior, mostly in white, but on the Stealth Caravans stand, in black!

We've gained the business from these companies by delivering a superior level of service commitment and a higher consistency of product quality than they had ever previously experienced.

A DIFFERENT KIND OF WATER TREATMENT

The last REVIEW highlighted our recent completion of a £1m+ contract to provide covers for Water Treatment tanks in Lancashire- now here's a different kind of Water Treatment solution, this time in Lanarkshire! Not so big a contract but demanding in its own way none-the-less. The Time Capsule in Coatbridge is a typical 'leisure' pool, with little room for swimming but a variety of ways to have frivolous aquatic fun. Built as a pioneering facility of its type in the 80's, it is now undergoing a major refurbishment as well as having a variety of new 'thrills' added. As with any project which relies on being 'open for business' for its income, time is of the essence, budgets are under pressure, and the less disturbance of infrastructure the better. With these three criteria critical, Production Glassfibre were able to offer our services in two specific areas. **Lining treatment tanks** may not be particularly glamorous, but our process negated the need to dismantle the existing ones and take down walls in order to permit their replacement. And even if containing the most aggressive chemicals, they'll last at another 20 years.

Lining Water Flumes is more interesting, and in all honesty, more difficult, but even more rewarding when measured against the three criteria! Removing the old surface, strengthening the remaining substrate then applying the polished gelcoat to supply the slippyness on a constant shift basis certainly minimised disruption and surely saved on budget.

NOW WE'RE (ALSO) 50!!!!!!!

After our success in providing Ginetta with the bodywork for the G40, Production Glassfibre are now proud to have become the supplier of all mouldings on its older, faster, bigger brother, the G50. Raced throughout the world from Brazil to Malaysia, it's best know in the UK for supporting the BTCC where 20+ cars in close 'combat' make a spectacular sight.

To celebrate our newly won business, we put Jonny Adam in the 'celebrity' car for the Knockhill round of the Championship- and of course he didn't let us down, by setting pole for the first race, and after a bit of drama, winning the 3rd.
