Markey

Despite more moulders disappearing as the market remains restricted, Production Glassfibre continues to add products to its range and customers to its portfolio. Last quarter we added Dormers, another Canopy variation and a different Door Surround, bringing our total number of House Building products to 127!

With factories in the South, North and Scotland, we can provide a local service in most parts of the country, and because House Building Products are only a part of our business you can be sure we'll still be around when you're finishing your site. Supplying mouldings to sectors which are less economically affected such as Water Treatment, Medical Devices and Public Transport keep us busy, and as you can see on the page over, we're more than active with the Construction and Car industries!

As well as our regular Dormer/Canopy/Door Surround range, we've also been busy with Shop Fronts in the Midlands, a Cinema Entrance in Devon and Bat Housings in Norfolk. We're obviously proud of our Standard Product range; but not so proud that if what you want isn't in the catalogue we won't be delighted to provide prices from your drawings! Each factory is able to manufacture the tooling as well as the product, so please don't hesitate to make contact with us so we can discuss your glassfibre needs.

## CONSTRUCTION SECTOR SUMMARY

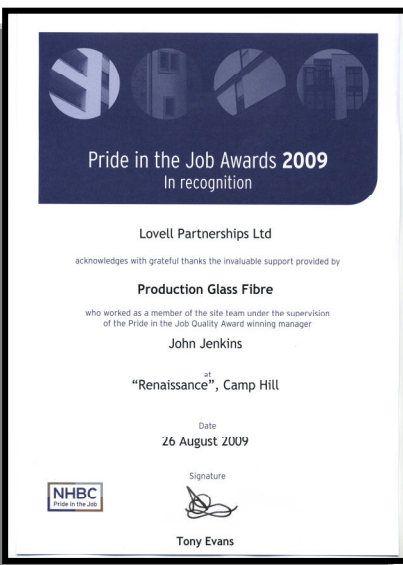

Now here's an interesting piece of work!!! Complex curves we're well used to, and in the last Review we showed some pretty massive mouldings going to cover a sewage works in Cyprus, but combining size and sophistication makes for something special! This giant and another five like it, will eventually find it's way to the London Olympic Pool in time for a concrete pour which should end up looking like the Diving Boards in the illustration below.

Iranian Architect Zaha Hadid was tasked with designing a landmark building for the Games, and she certainly hasn't ignored the interior! Presently being manufactured at our factory in Altham, Production Glassfibre were uniquely competent to undertake such a project having premises big enough, a workforce experienced enough and technical staff clever enough to make sure the multi-piece, many-angled, massively strong 'shutters' are right first time and delivered on time.

So add Diving Boards to car parks, office blocks, bridges, tunnels and rugby stadium we've created shuttering for in the past 10 years.

## PROUD OF OUR PRIDE IN THE JOB AWARD

In the present economic climate an Order can be a treat and a Remittance reward enough, but being recognised for doing a good job brings an extra feeling of satisfaction. We pride ourselves in an exceptional level of 'promise kept' service and it was with great pleasure we received our Pride in the Job Award from Lovell Partnerships, one of our longest standing customers and one of the countries largest developers.
